
MICROSOFT AZURE ISV PROFILE: ESET

Since 1987, ESET® has been developing award-winning security software that now helps over 100 million users to Enjoy Safer Technology. The company has a global sales network covering 180 countries, and regional offices in Bratislava, San Diego, Singapore, and Buenos Aires.

WHAT WE OFFER

This solution utilizes the proven ESET NOD32® scanning engine and eliminates all types of threats, including viruses, rootkits, worms, and spyware. Its new detection technology – Exploit Blocker – strengthens protection against targeted attacks and previously unknown exploits – i.e. zero-day attacks.

ESET File Security combines high detection speed, smooth performance, and stability to ensure a continuously high level of security. Its light processor demands and low memory consumption ensure that more system resources are devoted to the essential programs that you depend on daily.

With full support and documentation in multiple languages, a new user-friendly GUI, and easy, as-an-extension deployment in the Azure environment, this solution is optimized for user convenience as well as performance. Like ESET’s other new products for business, it was developed with extensive input from users and IT admins.

It’s compatible with ESET Remote Administrator 6, which allows you to oversee your entire network – including workstations, servers, and smartphones – from a single point via a web-console. New agent-based architecture streamlines network security and minimizes administrative overhead.

WHAT OUR CUSTOMERS ARE SAYING

"ESET has brought reliability and stability and therefore a great trust in the product to us and much peace of mind. And all of this for a price that is very cost-effective!" – Eric Mattioni, IS Operations Manager, The Hospital Center of Luxembourg

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

**KEY USE CASES**

**WEB APPLICATIONS**
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

**CLOUD STORAGE**
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

**BIG DATA & HPC**
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

**MOBILE**
Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

**MEDIA**
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

**FLEXIBLE APPLICATION MODEL**
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft’s promise to let you build using any language, tool, or framework.

**ALWAYS ON, ALWAYS HERE**
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

**DATA CENTER WITHOUT BOUNDARIES**
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

**GLOBAL REACH**
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
