MAIL SECURITY
FOR LINUX/FREE BSD

ENJOY SAFER TECHNOLOGY™
Operating Systems:
Linux: Kernel version 2.6.x; glibc 2.3.2 or higher
FreeBSD: Version 6.x, 7.x, 8.x
Sun Solaris: Version 10
NetBSD: Version 4

Processor Architecture:
Intel®/AMD® x86/x64

Antivirus and Antispyware
- Scans all inbound and outbound POP3, SMTP and IMAP traffic
- ESET SMTP module runs independent of the Mail Transport Agent (MTA)
- Filters out email-borne threats, including spyware at the gateway level
- Powered by the advanced ThreatSense® technology combining speed, accuracy and minimal system impact

Antispam
- Stops spam and phishing messages with high interception rates
- Features improved antispam engine with an option to define threshold levels with great precision

Cross-platform Protection
- Eliminates malware targeting all platforms, including Windows, Mac and Linux operating systems
- Prevents spreading of malware from one platform to another

Remote Administration
- Compatible with ESET Remote Administrator and supports management through a web interface
- Gives you the option to schedule on-demand scans, actions and security tasks
- Allows you to customize log details and modify reports and notifications to help you monitor compliance with company security standards

Smooth Operation
- Features content filters for Postfix, Sendmail, Qmail, Exim, Zmailer, and others
- Smoothly integrates in the Novell Groupwise environment
- Ready for integration with Zarafa collaborative software
- Built-in license manager automatically merges two or more licenses with the same customer name

Distribution Independent Solution
- ESET provides installers for the most popular distributions
- Gives you the option to use the general installation package for less common systems not supported directly
