DELIVERING BENEFITS TO MEDIUM AND LARGE BUSINESSES
LOWER COST
Lower costs

**Built-in Data Access Protection**

**PROBLEM**
We need to manage online and offline data access but dedicated tools are expensive, need additional management, and increase endpoint hardware demands.

**SOLUTION**
Built-in Data Access Protection. ESET Endpoint Security comes with built-in Anti-Phishing, Device Control, Web Control, Firewall and other functionalities to cover these security demands.

**BENEFIT**
No need to pay for and maintain dedicated tools, or upgrade your hardware to cope with them.
ESET License Administrator

**PROBLEM**
Our IT budget is constantly scrutinized, and costs need to be attributed accurately. But it’s difficult to keep track of how many licenses we are using or if we are paying for too many.

**SOLUTION**
ESET License Administrator. Our new licensing administrator handles all licenses transparently, in one place – from where you can merge, delegate and manage them centrally, in real-time.

**BENEFIT**
You get the most out of your licenses, with no seat wasted. Your IT department can plan and manage resources better.
Two-factor Authentication

**PROBLEM**
Two-factor authentication systems are expensive. They need dedicated infrastructure and hardware, and deployment and setup is time-consuming and expensive.

**SOLUTION**
ESET Secure Authentication, our mobile-based two-factor, one-time password (2FA OTP) solution, is easy to deploy, and can be set up in just 10 minutes.

**BENEFIT**
No extra hardware is needed – you just use your mobile phone to generate a unique password. ESET Secure Authentication is easy to install and deploy on your current network infrastructure.
Mobile Devices Secured

**Problem**
Mobile device management (MDM) addresses many BYOD challenges but is expensive and complex to deploy, and represents yet another management tool.

**Solution**
With ESET Endpoint Security for Android you retain control of all your devices via ESET Remote Administrator.

**Benefit**
No need for an expensive MDM tool - with ESET Remote Administrator, you can manage device security alongside desktop and server security.
Virtualization Support

**PROBLEM**
We are virtualizing our network and are afraid of AV storms and the overall performance of anti-malware solutions on virtual machines (VMs).

**SOLUTION**
Virtualization Support: ESET Shared Local Cache prevents scanning of the same files on all VMs. Moreover, an agentless solution is available for platforms supporting such an approach.

**BENEFIT**
Your VMs run faster because ESET's anti-malware solution won’t slow them down. There’s no need to upgrade your hardware to offset degraded VM performance when running ESET.
MOBILE CAPABILITIES
Mobile capabilities

**Built-in Data Access Protection**

**PROBLEM**
We need to manage mobile workforce data access (to websites, connections, offline devices) – and stricter rules than for in-house users.

**SOLUTION**
Built-in Data Access Protection: ESET Endpoint Security comes with built-in Anti-Phishing, Device Control, Web Control, Firewall and other functionalities to cover these security demands.

**BENEFIT**
Your mobile workforce's online and offline communications and data stay safe all the time, even when outside your company network.
Two-factor Authentication

**PROBLEM**
We need to be sure that only authorized users can access our systems remotely.

**SOLUTION**
ESET Secure Authentication, our mobile-based two-factor, one-time password (2FA OTP) solution, is easy to deploy, and can be set up in just 10 minutes.

**BENEFIT**
Only authorized users are able to access sensitive data.
Mobile Devices Secured

**PROBLEM**
Our mobile workforce uses company mobiles, but they must remain malware-free. We also need to retain control if they go missing, and enforce company policies for apps.

**SOLUTION**
ESET Endpoint Security for Android allows your admins to stay in control of all your devices without any need for a dedicated mobile device management tool, using ESET Remote Administrator.

**BENEFIT**
Keep control of your devices, protect them from loss, and shield the data they hold - immediately.
Mobile capabilities

Encryption

**PROBLEM**
Our mobile workforce sends and receives sensitive data. What if the data were to fall into the wrong hands, or if a laptop were lost or stolen?

**SOLUTION**
Encryption: ESET features an easy to deploy and manage encryption solution, which is scalable according to your needs.

**BENEFIT**
ESET encryption keeps company data secure even if they fall into the wrong hands.
Mobile capabilities

Automation by Agent

**PROBLEM**
What if one of our mobile workforce encounters a security issue on their laptop while there is no connection to the remote management tool? Is the laptop secure?

**SOLUTION**
Automation by Agent: All tasks are run by an independent agent directly on the laptop, even without connectivity to ESET Remote Administrator. Results (logs) are then synchronized upon connection.

**BENEFIT**
Actions are taken to ensure that the highest level of security is maintained for your mobile workforce at all times, wherever they are.
OUTSTANDING USABILITY
Outstanding usability

Low System Demands

**PROBLEM**
IT security solutions slow down our computers and our people too, leading to complaints from users.

**SOLUTION**
ESET is famous for its low demands on systems. All our products are optimized to ensure high-speed running, as confirmed by independent testing.

**BENEFIT**
Your computers don’t run slower – and nor do your people. The result: no more user complaints.
Outstanding usability

User-friendly Management Console

**PROBLEM**
We need a “look & see” security overview that is easily accessible, while retaining full management of IT security.

**SOLUTION**
Our new web-console combines extremely user-friendly interface and data visualization with drill-down capabilities, and was developed based on in-depth consultation with IT professionals.

**BENEFIT**
Straightforward IT security management via a simple yet powerful web-console, which is completely intuitive to use and accessible from anywhere.
Outstanding usability

RIP & Replace

**PROBLEM**
Migrating from one anti-malware vendor to another demands a lot of time, effort and IT resource – it’s easier not to switch.

**SOLUTION**
RIP & Replace: ESET Endpoint solutions now uninstall all redundant anti-malware software during their installation, and endpoints are deployed pre-set up.

**BENEFIT**
Migration to ESET is seamless – RIP & Replace makes the process easy.
Outstanding usability

ESET License Administrator

**PROBLEM**
It’s difficult to manage licenses dynamically in response to changes in our network. Our IT budget is constantly scrutinized and we need a way to demonstrate spending on licenses is effective.

**SOLUTION**
ESET License Administrator. Our new licensing administrator handles all licenses transparently, in one place – from where you can merge, delegate and manage them centrally, in real-time.

**BENEFIT**
License handling made easy – manage your licenses centrally, in real-time.
